WPD PACKAGES FOR EMPLOYERS

IMPORTANT: This service is tailored to your requirements and we will discuss which options you require which will meet your needs.

Why WPD + Payroll?

Workplace Pensions Direct has established itself in the market as one of the leaders for supporting employers, accountants and advisers with regards to Auto Enrolment legislation. We have a team of pension and payroll experts and liaise directly with the regulator on your behalf.

We are also the only company to truly offer a Payroll and Pensions Full Compliance Guarantee. Peace of mind knowing the responsibilities are passed to us.

What Does WPD Payroll Cover?

You will get a UK Based Dedicated CIPP Qualified Payroll Services Manager who will seamlessly help you transfer your existing solution to us. You do not need to pay for any additional software.

What Do Your Packages Offer?

That depends on your circumstances. If you have no pension scheme required to be set up, you still have legal duties so we will offer you our “**Duties Only**” package.

If you require a scheme but your payroll manager is happy to invest the contributions into a scheme, we will go through the set up with them and that forms part of our “**AE Essentials**” package.

Should your payroller require us to upload pension files, we will discuss how we require the data, that is all covered in our “**AE Plus**” package.

Of course, if you want our recommended package offering true payroll and pensions guaranteed compliance and support all in one place with the same team managing all your data, our “**AE + Payroll**” is the right service for you.
